## Sino-Swedish Colloquium on Global Sustainability Governance

### 中瑞全球可持续治理研讨会

18 – 19 March 三月 2024 • 武汉大学 Wuhan University

Five decades after the UN Stockholm Conference on the Human Environment that marketed the beginning of global environmental governance, the world, with mounting geopolitical tensions, has been becoming increasingly divided and polarized. However, this polarized world, as threatened by the “triple planetary crisis” – climate change, pollutions, and biodiversity loss, is now struggling with achieving the 2030 Sustainable Development Goals (SDGs), which calls for more solid joint efforts and collective actions including the indispensable role of both Sweden and China.

Particularly, climate change, despite posing a crucial collective challenge, also offers a pivotal opportunity for a rejuvenated momentum of global sustainability governance in this polarized world. Moreover, operational standards in industrial and commercial activities as well as corporate governance models are also expected to be in line with measurable sustainability targets. New concepts and governance tools such as “greening global supply chains” and “Environment, Social, and Governance (ESG)” are increasingly reshaping a new horizon for sustainability governance towards climate neutrality in this polarized world.

Facing the urgent call for global sustainability governance towards climate neutrality, all stakeholders should work hands in hands, including both China and Sweden, both scholars and policy makers, both academia and private sectors. Against this background, scholarly communications and academic exchanges focusing on the nexus of global governance, sustainable development, and climate neutrality between Chinese and Swedish actors through this Sino-Swedish Colloquium might have the potential of sending a strong cooperative signal to the polarized world in support of a harmonized global sustainability governance towards climate neutrality that we can eventually be proud of.

武汉大学环境法研究所与北欧著名学府瑞典隆德大学于 2024 年 3 月 18 日到 19 日在武汉大学共同举办第一届“中瑞全球可持续治理研讨会”。全球性气候变化是人类社会所面临的共同挑战，亦是国际社会实现联合国 2030 可持续发展目标的集体考验。面对纷繁复杂的国际变局以及风云变幻的世界格局，全球气候治理与合作的机遇与挑战并存。瑞典是与新中国建交的第一个西方国家，中国与瑞典虽相隔遥远，但都对推动全球气候治理以及全球可持续发展合作起到了不可或缺的积极作用。本次“中瑞全球可持续治理研讨会”广邀中瑞两国知名专家学者，围绕实现碳中和的全球治理路径，论道珞珈山，共话全球气候合作！

同时，本次中瑞全球可持续治理研讨会亦是武汉大学环境法研究所珞珈环境法论坛第二十九期。
